## Targeting ESPN CO-OP Web Development Position

- Upcoming University of Hartford Computer Science graduate offering an academic background in IT, along with a semester of student teaching assistant for a Java class and a multi-language programming tutor.
- Extensive on-campus work experience as a network administrator, on a 3 person team in-charge of 10 enterprise level servers and 50 workstations
- Ambitious passion for web development, taught myself advanced PHP, HTML, CSS, XML, MySql, Java and UNIX server administration prior to college
- Web entrepreneur, over 100+ hours spent on recent PHP projects, all available at vkaloidis.com
- Bi-Lingual: Greek Proficient (basic read/ write) and English
- Investment Experience – Had a diversified stock portfolio at 18 after creating a Scottrade account and funding it myself

## IT Experience

**University of Hartford Student Network Admin** – (2009 – 2011) Responsible for engineering, maintaining and upgrading computer science department servers (10 of them). There were individual servers responsible for CS Department webmail, databases, Windows domain controllers/ active directory servers, Mac servers and VMware servers. We also were responsible for deploying images on fifty clients with software prepared for the various computer science classes.

**Waterbury Hospital (CT) I.T. Department Internship –** (2007 – 2008) Worked full time during summer hospital wide (over 3,000+ computers) operating system upgrades as an intern assisting the admins and technicians. Along with two other interns, our team analyzed each departments (hospital floor's) current software configuration, backed up each doctor's files, prepared several disk images with the upgraded operating system then configured the medical software needed by that floor, manually installed the image to each computer on the floor then configured all the medical software to connect to the hospital servers
